

SCOTTY Z-Box

The SCOTTY Z-Box is a breakout box that provides the convenient connection of external audio and video equipment to a SCOTTY Z470 codec.

The Z-Box is connected to the Equipment Connector of the Z470 codec or Z470-based SCOTTY system. The cable is long enough to place it on top of the computer or desktop giving easy access to the audio/video connectors:

VIDEO INPUTS

- > Camera 1: S-Video or composite or HD 15 (video in, audio in, power for camera, RS232 for camera control)
