

TECHNICAL NOTE V002

Parallel Camera and Monitor Connection to mm Series and eyesite® Series Products

© SCOTTY Group plc, 2004 U-9901-02002

Introduction

In some situations it may be necessary to connect a monitor in parallel with a camera when inputting video to a product. To achieve this it is necessary to buffer the video when connecting the monitor. **Failure** to do this may result in damage to the video input of the product. The following diagram details this connection.
